Media Center

The NetLibrary Media Center

The Media Center is a premier desktop application for searching, managing, downloading and listening to eAudiobooks.

Available as a free download, the application provides an intuitive user interface, enhanced features and a rich array of functionalities, and is compatible with most Windows computers.

Single-click download to a portable device

With a single click, the Media Center will check out an eAudiobook title from your library's catalog, acquire the user license and download the title to the user's PC or portable audio device.

Feature-rich, easy-to-use interface

The Media Center combines all the familiar user functions available from NetLibrary's Web-based platform (browse, search, checkout), plus these enhanced features and functionality for a superior user experience:

- Full-featured audio player
- Seamless download to a wide range of portable devices, including Apple's iPod® and iPhone
- Desktop access to your library's entire eAudiobook collection
- User preferences plus My Favorites and History

View a demo of the Media Center at:

Title segmentation

For ease of download, playback and storage, eAudiobooks are divided into segments, approximately 1 hour in length. A 10-hour eAudiobook would therefore have 10 segments. Users can download all segments at once or one at a time. This function enables quick navigation within an eAudiobook title and faster downloads, particularly for low-bandwidth or wireless connections. It's also useful if there is limited space on the user's PC or portable device.

The Media Center is easy to learn and use, even for first time computer users. Plus, the Media Center is convenient, flexible and best of all, it's fun!
