New Project

Project Description

As part of the Division's emergency planning process a need exists for a stand-by emergency generator which would allow the landfill to assist in recovery efforts during an extended electrical outage. By purchasing a large trailer mounted generator basic office, communication and accounting functions would be maintained. During the night when the landfill would be closed the generator would be moved and connected to the leachate pump station for discharge to the City sewer.

Legislative / Policy Compliance Statement

The emergency generator would insure that leachate would be treated in accordance with Chapter 62-701 F.A.C. Worst case would be for leachate to overflow into adjacent surface water or Lake Lafayette.
